PROFESSIONAL SKILLS

Lifelong Learner: Strong passion for continuous personal and professional growth, demonstrated through ongoing engagement with the latest technological advancements and coding languages.

Analytical Problem Solver: Excellent analytical abilities, adept at identifying, dissecting, and resolving complex problems.

Leadership & Mentorship: Effective leader with a track record of guiding small tech teams towards achieving specific goals

WORK EXPERIENCE

Backend Software Developer
XCALE Consulting

05/2022 - Present   *Remote - Madrid/Spain*

- Thrived as a Backend Developer at one of Spain's leading ticketing companies, renowned for handling ticket sales for the biggest sports and cultural events across the country. This included top clubs like Real Madrid and Atletico de Madrid.
- Ensured the scalability and reliability of our systems to handle high-volume ticket sales during peak demand times, such as major football matches and large-scale concerts.

Software Developer
IBM / Kyndryl

05/2021 - 05/2022   *Remote - India International Team*

- As part of IBM's India-based automation team, I developed software solutions that enhanced the operational efficiency of a multitude of clients, including major names like AirCanada. My role bridged the technical and cultural gaps between diverse development teams in India and Argentina, fostering a collaborative international environment.
- Advanced RPA Professional certification obtained.

Junior Developer
Lumera IT · Freelance

07/2020 - 05/2021   *Remote - Brazil*

- Developed critical backend and frontend components of a digital registration system, focusing on scalability and security to handle sensitive public data efficiently.
- Collaborated in a dynamic team environment, contributing to the system design and feature implementations that significantly improved service delivery metrics.

Field Engineer (Oil & Gas)
Weatherford International

10/2011 - 07/2020   *Argentina / Venezuela*

- Engineer and prepare advanced drilling tools for operational deployment, involving sophisticated programming and rigorous testing of hardware and software systems.
- Conduct comprehensive evaluations and prepare detailed documentation on cutting-edge technologies to ensure robust performance and seamless integration in field operations.

EDUCATION

Electronic Engineer
Universidad Rafael Belloso Chacín (URBE)

09/2007 - 07/2011   *Maracaibo - Venezuela*
